

RING SIZING GUIDE

For accuracy, please make sure the PDF is printed at 100%. Use a quarter to check if this page is printed at the correct size.

We created this guide to help you determine your ring size. However, a ring size can be affected by knuckle, type of ring, and width of a ring band. Therefore, we highly recommend going to a local jeweler and getting sized in person, if possible. If you have any questions please call (867) 667-7403 or email murdochs@yukonbooks.com.

Method A:

1. Cut out the ring sizer.
2. Cut a slit on the vertical red line.
3. Wrap the sizer around the finger where the ring will be worn. (Make sure the numbers are facing out).
4. Pull the pointed end Tab "B" through Slot "A" until the sizer fits comfortably around your finger (Make sure to allow size for your knuckle).
5. The number aligned with Slot "A" is your ring size.
6. If the measurement lands between two numbers, your size is a half size. (for example: If your measurement falls between 6 and 7, your ring size is 6.5).

Method B:

1. Find a ring that properly fits the intended finger.
2. Place the ring over the circles. Match the inside edge of the ring to the circle closest in size.
